Key Stockholders Issues

Our proposal offers substantially greater short and long-term value. Meeting to discuss our superior proposal presents no downside risk and only upside for stockholders

- A Superior Proposal is available to stockholders, reflecting a 11% premium or \$1.1 billion of additional value (as of 5/6/2011)
- The actions of the NYSE Euronext Board hide behind Delaware case law, rather than align with the interests of its stockholders
- Antitrust risks exist in both transactions, though only NASDAQ OMX and ICE included a reverse break-up fee. For the NYSE Euronext / Deutsche Börse (DB) transaction, NYSE Euronext stockholders are still required to vote before antitrust approvals or conditions are determined
- HSR review of proposal is underway and NASDAQ OMX and ICE have received and are responding to a Second Request for information in connection with NASDAQ OMX's filing
- The Deutsche Börse agreement allows for discussions and due diligence to occur in the event NYSE Euronext receives a proposal that may possibly be determined to be superior, yet NYSE Euronext refuses to engage with NASDAQ OMX / ICE
- The strategy for the lower-value combination with Deutsche Börse has not been articulated or differentiated from the current strategy, which has underperformed – 3-year EPS CAGR of (8)% for NYSE Euronext and (6)% for Deutsche Börse ⁽¹⁾
- The strategy of the NASDAQ OMX/ICE proposal is to create two strong pure play exchanges which will be operated by management teams who have consistently delivered industry leading results – 3-year EPS CAGR of +10% for NASDAQ OMX and +17% for ICE ⁽¹⁾
- NASDAQ OMX and ICE stand ready to meet with the NYSE Euronext Board to discuss the proposal and begin due diligence in an expedient manner with appropriate safeguards to protect competitively sensitive information, and work toward a superior outcome for NYSE Euronext stockholders

A Fair and Balanced Merger Agreement

Without the benefit of a dialog with the NYSE Euronext Board, NASDAQ OMX and ICE presented a fair and balanced Merger Agreement based largely on the existing Deutsche Börse agreement. The companies remain open to discussing and addressing any legitimate concerns NYSE Euronext has on execution and to negotiating a merger agreement that is acceptable to each of our companies

- 1) **Why is March 2012 set as the merger agreement termination date?** The March 2012 deadline is simply a holdover from the date included in the Deutsche Börse agreement for their own timelines. If NYSE Euronext I has concerns about the date, we would look forward to discussing them with the NYSE Euronext board.
- 2) **What are the financing conditions?** There are no financing conditions. NASDAQ OMX and ICE are required to show up with the funds at closing.
- 3) **Why include a change in Fiduciary Recommendation?** This provision mirrors that included in the Deutsche Börse agreement and addresses requirements of Delaware law.
- 4) **Why include a “double” Break-Up Fee?** If a bidder tops the NASDAQ OMX/ICE deal once NASDAQ OMX/ICE have paid the break-up fee to Deutsche Börse we should not be left empty-handed on a net basis.
- 5) **Why does NYSE Euronext not have the right to Specific Performance?** However, we note that NYSE Euronext has no right to specific performance in the Deutsche Börse agreement, either. We look forward to discussing this with the NYSE Euronext Board.
- 6) **What improvements did you make?** In addition to a financially superior offer, we have added a \$350mm reverse break-up fee payable in the event of a failure to obtain antitrust or competition approvals and removed the burdensome “force the vote” obligation to which NYSE Euronext agreed with Deutsche Börse. Furthermore, we only require approval by holders of a majority of the outstanding NASDAQ OMX and ICE shares, unlike the DB / NYSE transaction, which is conditioned on tender by the holders of at least 75% of the outstanding DB shares.

DB's Additional Synergies Are Not Credible

NYSE Euronext investors should be highly skeptical that after two years of exploratory merger discussions, including more than six months dedicated to finalizing the transaction, NYSE Euronext has suddenly found a reported €100 million in additional synergies

- This increase appears not to be a matter of sharpening a pencil, but an unexplained shift in strategy
- The discovery that initial synergies were understated by one-third comes after receiving a Superior Proposal from NASDAQ OMX and ICE that achieves greater synergies
- If there are additional synergies to be found after the merger economics have been agreed, then it has to come at the expense of NYSE Euronext stockholders because there has been no increase in the price they are being offered
- NYSE Euronext should describe these newly-found synergies in detail in order to support the credibility of these revised estimates, particularly in light of commitments to retain two technology platforms and two headquarters
- Increasingly it appears that NYSE Euronext is more focused on protecting the transaction than its stockholders
- NASDAQ OMX and ICE have described in detail our proven and focused long-term strategy from which stockholders would benefit and our companies demonstrated outperformance relative to their proposed strategy of creating a financial supermarket
- We look forward to having the same opportunity when the NYSE Euronext Board agrees to due diligence

| NASDAQ / ICE PROPOSAL FACES UNACCEPTABLE ANTITRUST RISKS | <ul style="list-style-type: none"> The NASDAQ OMX / ICE proposal will not survive review by antitrust regulators antitrust issues regarding U.S. listings cannot be overcome Potential European competition issues with DB proposal will be easily resolved | <ul style="list-style-type: none"> NASDAQ OMX / ICE proposal recognizes the global nature of competition for listings and trading and the dramatic increase in off-exchange trading A combined NASDAQ OMX / NYSE will create a global listing franchise that can attract issuers from around the world, create deeper and more liquid markets, improve transparency, increase market access and connectivity, enhance effectiveness of regulation and create a better advocate for issuers on regulatory matters The U.S. listings business is tightly regulated by the SEC Listing location is independent of where a stock actually trades HSR review of NASDAQ OMX and ICE proposal is underway and both NASDAQ OMX and ICE are responding to a Second Request for information in connection with their filings The DB proposal will be subject to a lengthy and extensive regulatory and competition review due to combined Euronext / Liffe market position in European derivatives and provides no protection for NYSE Euronext stockholders in the event that DB fails to receive regulatory approval Unlike the DB proposal, NASDAQ OMX / ICE proposal includes a \$350mm reverse breakup fee in the event of a failure to obtain required antitrust or competition approval |

| DB PROPOSAL DELIVERS GREATER LONG-TERM STAKEHOLDER VALUE | <ul style="list-style-type: none"> Merger-of-equals structure gives stakeholders exposure to the strongest global exchange group The DB proposal delivers greater capital efficiency savings to the market participants DB and NYSE Euronext have a strong track record of delivering on synergies and efficiently integrating acquisitions NASDAQ OMX / ICE proposal may offer higher short-term value but will result in significantly lower long-term value for stakeholders | <ul style="list-style-type: none"> NASDAQ OMX / ICE proposal offers far greater long-term value from synergy opportunities – \$740mm of anticipated synergies vs. DB proposal of \$533mm (revised to \$728mm) NYSE Euronext and DB management have been unable to realize stated synergies in past acquisitions NYSE Euronext and DB's poor integration and execution have resulted in meaningful value destruction for shareholders with over \$2.5bn of write-downs since 2008 NASDAQ OMX / ICE proposal creates two global exchanges under proven and specialized management teams with strong track records of achieving synergies and integrating acquisitions NASDAQ OMX and ICE have superior track records of creating stakeholder value – both have delivered double-digit earnings growth over the past 3 years while NYSE Euronext's and DB's businesses have declined Size and being a "diversified conglomerate" does not ensure success or an increase in shareholder value NYSE acquired Euronext for \$10bn - the same value DB is offering for both NYSE and Euronext |
| SYNERGIES EXPECTED IN NYX / DB COMBINATION ARE CONSERVATIVE | <ul style="list-style-type: none"> After "sharpening their pencils", NYSE and DB found €100 million in additional synergies. Total synergies could reach approximately €500mm (\$728mm) compared with \$740mm in the NASDAQ OMX/ICE proposal | <ul style="list-style-type: none"> NYSE and DB have historically failed to achieve targeted synergy levels and implementation timing DB failed to integrate the ISE technology platform 3 years following the transaction NYSE failed to realize over \$100mm in promised synergies in the Euronext acquisition NASDAQ OMX and ICE management teams have proven track records of achieving synergies and integrating acquisitions Any additional synergies now discovered represent lost value for NYX stockholders with no change in merger economics |

| NASDAQ OMX / ICE PROPOSAL IS STRATEGICALLY UNATTRACTIVE AND LACKING IN BUSINESS LOGIC | <ul style="list-style-type: none"> Combination with DB is consistent with NYSE Euronext's long-term strategy Breaking up NYSE Euronext into its pieces will destroy value and create an unattractive portfolio of businesses Globally diversified exchanges are more competitive and provide superior value for stakeholders NASDAQ OMX would be highly concentrated in cash equities which is becoming a low-growth, low-margin business | <ul style="list-style-type: none"> NASDAQ OMX / ICE proposal creates two nimble entrepreneurial global exchanges run by two best-in-class operators in cash equities and derivatives that are better positioned to compete globally and adapt to rapidly changing industry dynamics NASDAQ OMX / ICE proposal unlocks greater value and provides stakeholders with exposure to two leading pure play exchanges and over 60% exposure to the high growth derivatives sector, while the DB proposal offers exposure to a single exchange that will likely receive a conglomerate discount A combined DB / NYSE Euronext will be an inefficient, bureaucratic "supermarket" exchange model with an entrenched management team |
| NYSE EURONEXT IS NOT FOR SALE | <ul style="list-style-type: none"> The proposed DB transaction is not a sale of the NYSE Euronext but rather a merger-of-equals The NASDAQ OMX / ICE proposal is a takeover that undervalues the pieces of the company | <ul style="list-style-type: none"> The DB / NYSE transaction is a low-premium takeover (only a 10% premium to unaffected share price at announcement) DB will control the Board and each Board Committee; DB CEO will be responsible for group strategy and global relationship management; DB President will become Deputy CEO and President of the combined entity; DB CFO will become CFO of the combined entity If NYSE's different businesses are undervalued as claimed, then NYSE has grossly mismanaged its businesses and has failed to pursue a strategy that increases shareholder value |

NYSE EURONEXT'S OBLIGATION TO STOCKHOLDERS

NASDAQ OMX AND ICE HAVE TAKEN A SERIES OF STEPS DEMONSTRATING COMMITMENT TO PURSUING THEIR PROPOSAL

- Developed financially and strategically superior proposal to current transaction with Deutsche Boerse
- Provided Merger Agreement substantially consistent with terms of current Business Combination Agreement with Deutsche Boerse
- Included \$350 million reverse break-up fee, demonstrating confidence in obtaining antitrust and competition approvals
- Secured committed financing totaling more than \$3.8 billion
- NYSE need not determine that NASDAQ OMX/ICE proposal is "Superior" prior to due diligence

BY REFUSING TO ENGAGE, NYSE EURONEXT BOARD IS DENYING ITS STOCKHOLDERS OPPORTUNITY TO BENEFIT FROM A CLEARLY SUPERIOR PROPOSAL

- 11% premium to Deutsche Boerse proposal, or \$1.1 billion, as of May 6, 2011
- Current agreement with Deutsche Boerse does not include break-up fee if transaction is blocked by regulators
- Deutsche Boerse transaction requires that 75% of DB shares are tendered
